ABSTRACT

The study was made to developed a computer based inventory system suited generally for Dasmariñas Water District . The DWD inventory system covers the transaction and inventory operations of the said department. It was developed using Visual Basic 5.0 programming language.

The proponent have identified the following goals for an automated inventory system:

- To provide detailed information on inventory stock level status and product specification of all items to support inventory management activity.
- To provide automated records of monthly transactions.
- To automate report generation deviating it from the tedious and error prone procedures.
- To automate computation needed in report generation to control inventory balances.

The proposed system was developed specifically to provide better service for customers, thus offering the department an advanced interface in inventory processing.

TABLE OF CONTENTS

1.0	**Introduction**	**1-1**
	1.1 Background of the Study	1-1
	1.2 Statement of the research Problem	1-2
	1.3 Statement of Objectives	1-3
	1.3.1 General Objectives	1-3
	1.3.2 Specific Objectives	1-3
	1.4 Significance of the Study	1-4
	1.5 Scope and Limitations of the Study	1-4
	1.6 Methodology of the Study	1-5
2.0	**Review of Related Literature**	**2-1**
3.0	**Theoretical Framework**	**3-1**
	3.1 Statement of Assumptions	3-1
	3.2 Operational Definition	3-1
	3.2.1 Definition of Terms	3-1
	3.2.2 Definition of Processes	3-2
	3.3 Theories Used in the Study	3-4
4.0	**The Existing System**	**4-1**
	4.1 Description of the System	4-1
	4.2 Definition of the Data Capture	4-1
	4.3 Inputs	4-3
	4.4 Process	4-3
	4.5 Files	4-7
	4.6 Outputs	4-9
	4.7 Problem Areas	4-10
	4.8 Data Flow Diagram	4-11
5.0	**The Proposed System**	**5-1**
	5.1 System Overview	5-1
	5.2 System Objectives	5-1
	5.3 Scope	5-1
	5.4 System Justification	5-2
6.0	**Design**	**6-1**
	6.1 Input	6-1
	6.2 Processes	6-1
	6.3 Files	6-9
	6.4 Outputs	6-9
7.0	**Implementation**	**7-1**
	7.1 Resource requirements	7-1
	7.1.1 Software requirements	7-1
	7.1.2 Hardware requirements	7-1
	7.1.3 Human Resources requirements	7-2
	7.2 Installation Plans	7-3
	7.2.1 System Installation	7-3
	7.2.2 Training Plans	7-4
	7.2.3 Conversion Plans	7-4

7.2.4 Testing 7-5

8.0 Cost Benefits Analysis 8-1
8.1 Intangible Benefits 8-1
8.2 Cost 8-2
8.3 Payback Analysis 8-5

9.0 Conclusions and Recommendations 9-1

LIST OF APPENDICES

Appendix A	Panel's Certification
Appendix B	Special Problem Clearance
Appendix C	Editor's Certificate
Appendix D	CRC Representative Certification
Appendix E	Adviser's Certification
Appendix F	Data Flow Diagram
Appendix G	Entity Relationship Diagram
Appendix H	Existing Forms
Appendix I	Normalization
Appendix J	Data Dictionary
Appendix K	Entity List
Appendix L	User's Manual
Appendix M	Sample Output
Appendix N	Screen Design
