ABSTRACT

NAME OF INSTITUTION: DE LA SALLE UNIVERSITY –DASMARINAS

ADDRESS: DASMARIÑAS, CAVITE

TITLE: IMPROVEMENT OF EXISTING MATERIALS ARRANGEMENT AND ITS IDENTIFICATION TO ELIMINATE LONG METHOD OF RECEIVING AND STORING OF MATERIALS IN THE LOGISTIC SECTION OF SUMINAC PHILIPPINES.

AUTHOR: JONAR S REYES

FUNDING SORCE: PARENTS COST: 1,500 (ESIMATED)

DATE STARTED DATE FINISHED:

January 23, 2001 March 9,2001

OBJECTIVES OF THE STUDY:

GENERAL

To be able to improve the arrangement of raw materials together with their proper identification to minimize work load of the worker

SPECIFIC

1. To develop critical thinking by solving the existing problem on logistics section of Suminac Philippines Inc.
2. To apply the principles and knowledge learned in school to actual activity.

3. To eliminate large number of stock and missing raw material

SCOPE AND COVERAGE

This study is limited only on the Logistic Section of Suminac Philippines Inc. Logistic Section is the one responsible for receiving, storing and releasing of raw materials and finished products. This study deals with the arrangement of raw materials on the stock rack and its proper labeling.

This study started last January 23 at present year and estimate to fully finish on the first week of March year two thousand.

METHODOLOGY

The author of this study , uses the combination of observation and research in gathering information and data to solve the problem.

MAJOR FINDINGS

After a series of observation ,the author of this study, identify the problem on releasing and storing of raw materials in the stock rack. Long method and unnecessary activity is being notice by the author that push him to conduct a study for improvement.

CONCLUSION

Proper arrangement of material and its identification will help the workers to eliminate climbing the stock rack and using forklift for lifting a worker to look for the item in the stock rack. This also result in a well organize workplace.
