

Expert Reflexology System

020100

An Undergraduate Special Problem

Presented to

**the Faculty of the Department of Mathematical
Sciences and Computer Studies**

De La Salle University - Aguineldo

Dasmariñas, Cavite

In Partial Fulfillment

of the Requirements for the Degree

Bachelor of Science in Computer Science

Krisna Jaymee A. Barredo

March 1997

ABSTRACT

Name of Institution: De La Salle University - Aginaldo

Address: Dasmariñas, Cavite

TITLE: Expert Reflexology System

AUTHOR: Krisna Jaymee A. Barredo

FUNDING SOURCE: Parents **COST:** 4,000.00

DATE STARTED: DECEMBER 1996 **DATE COMPLETED:** FEBRUARY 1997

OBJECTIVES OF THE STUDY:

A. GENERAL:

To create an Expert System in the field of Reflexology. To provide users an alternative way of treating diseases which Reflexology is most effective of.

B. SPECIFIC:

1. To help the people who could not afford to consult a doctor and buy medicine.
2. To support the government regarding their projects for the poor people.
3. To eliminate the danger of taking medicine due to its effects.

SCOPE AND COVERAGE:

The scope of the study would be the focused on the diseases that Reflexology is most effective in treating.

METHODOLOGY:

The five phases in developing an expert system was the method used to create the system.

OUTPUT OF THE STUDY:

1/ The Expert Reflexology System was developed to provide users enough information regarding the treatments of Reflexology and determines the possible causes of a disease. The system includes: warning information, problems that can be treated, the treatment for a specific disease and the possible cause. The system can also print the point of reflex. 1/

CONCLUSION:

An Expert System was developed in the field of Reflexology and is capable of giving illustration and brief information about the study.

RECOMMENDATION:

To widen up the scope of the study as well as the features of the system.
