**ABSTRACT**

**NAME OF INSTITUTION:** De La Salle University - Dasmariñas

**ADDRESS:** Dasmariñas, Cavite

**TITLE:** BASICOM Computer Assisted Instruction(CAI) on  
Basic Topics about Computers.

**AUTHOR:** Ma. Aileen I. Mararagan

**DATE STARTED:**Dec.,1996      **DATE COMPLETED:**Feb.,1997

**OBJECTIVES OF THE STUDY:**

**A. GENERAL:**

The study wanted to present BASICOM as a CAI that will help elementary students and the teachers in their tasks.

**B. SPECIFIC:**

The study aims:

1. to re-enforce teaching with the use of CAI.
2. to group pupil's abilities and skills through the CAI.
3. to visualize the lesson presented through the CAI.

**SCOPE AND COVERAGE:**

The study dealt on the basic topics about computers that is why it is called BASICOM. The topics covered were limited. The users were assumed to be a computer teacher and elementary pupils.

**METHODOLOGY:**

The best strategies devised for accomplishing this study is the systems approach. The program was developed using the Visual Basic version 4.0 and was implemented using a 586 microprocessor.

**OUTPUT OF THE STUDY:**

The CAI can really help elementary students and the teacher with their tasks. The system is user-friendly so that the user can easily manipulate the system.

**CONCLUSION:**

The lessons designed meets instructional abilities that adapt to the needs of the individual learners. Through BASICOM, the objectives of this study were met.
