This study entitled, **Level of Drug Awareness of 10th Grade Students Enrolled in Governor Ferrer Memorial National High School, Buenavista Annex, General Trias, Cavite: An Assessment**, was conducted in order to evaluate the status of drug awareness among the 10th grade students in order to understand the ongoing trend of illegal and legal drug use among youth these days. Unfortunately this ongoing trend is something that is not usually addressed by educational institutions as a responsibility and obligation.

Being able to protect the youth from harmful effects of dangerous drugs is one of the many obligations of the state to its citizens, as such, families, communities, and most especially schools should help in fulfilling that obligation. The researchers believe that all educational institutions should start addressing this matter now, and with that the researchers came up with this study, and provided recommendations for the inadequacy and flaws of the drug awareness programs that should be implemented in every school.
