## ABSTRACT

A survey was conducted to find out the different needs of the BSD faculty members, CPL staff members and BSD student majors and minors, to which the CPL caters. The questionnaire includes a list of needs classified into material resources, personal requirements and staff services. Results show that the top five needs of the BSD community are: (1) to acquire equipments that can be used in classes and research, (2) a place to conduct personal experiment (3) to conduct CPL research, (4) seek academic assistance from the staff, (5) to obtain training in writing research reports. Based on these needs, the researchers formulated and proposed action plans to the CPL for practical application.
