ABSTRACT

Name of Institution: De La Salle University-Aguinaldo
Address: Bagong Bayan, Dasmarinas, Cavite

TITLE: The Internal Efficiency of the Graduate School of Education, Arts and Sciences of DLSU-A as Evaluated by Students and Faculty, SY 1987-1995

AUTHOR: Esteban Tahil Salibay, Jr.

FUNDING SOURCE: FAPE COST: P 15,000.00

DATE STARTED: June 1993 DATE COMPLETED: March 1996

OBJECTIVES OF THE STUDY:

A. GENERAL:

1. To evaluate the internal efficiency of Graduate School of Education, Arts and Sciences of De La Salle University-Aguinaldo.

B. SPECIFIC:

1. To know the internal efficiency of the Graduate School of Education, Arts and Sciences as evaluated by the students and Faculty during School Year 1987-1991.

2. To determine the internal efficiency of the Graduate School of Education, Arts and Sciences as evaluated by the students and Faculty during School Year 1991-1995.

3. To find out the differences between the evaluation of the students and faculty during SY 1987-1991 and the evaluation of the students and

SCOPE AND COVERAGE:

The study was conducted at DLSU-A in Dasmariñas, Cavite. The sample population of 104 Graduate School students and 12 faculty members SY 1987-1995 was used in the study.

METHODOLOGY:

The study made use of the Survey instrument for Accrediting Graduate Education by the Philippine Accrediting Association of Schools, Colleges and Universities (PAASCU).

MAJOR FINDINGS:

The internal efficiency of GSEAS of DLSU-A as evaluated by that of the students and faculty SY 1987-1991 has a computed average weighted mean of 3.80 while that of the students and faculty SY 1991-1995 has a computed average weighted mean of 3.61. There is no significant difference between the evaluation of the students and faculty SY 1987-1991 and SY 1991-1995 of the internal efficiency of the GSEAS of DLSU-A.

CONCLUSIONS:

1. The internal efficiency of the GSEAS of DLSU-A as evaluated by students and faculty, SY 1987-1991 is Superior.
2. The internal efficiency of the GSEAS of DLSU-A as evaluated by students and faculty, SY 1991-1995 is Very Good.

3. Regardless of the period of evaluation the two groups of respondents have almost the same evaluation of the internal efficiency of the GSEAS of DLSU-A.

4. The GSEAS has maintained, preserved and sustained its high quality and standard.

5. Based on PAASCU rating scale Very Good rating for our GSEAS shows mediocre rating. Therefore, it could still be improved to reach the highest level which is Excellent.

RECOMMENDATIONS:

1. The Graduate School faculty should continue or maintain its internal efficiency which is high and improve on some aspects which need improvements.

1.1. Although in general the evaluators judged the salaries and fringe benefits of the faculty as Very Good yet with the current rising of prices and commodities and basic needs there is still a need to increase the salaries to cope with the ever changing situations.

1.2. Since many of the faculty in the Graduate School are also teaching in the undergraduate programs, efforts should be given by the administrators to hold and take care of those faculty so that they would not leave the
University.

1.3. Faculty Part-timers should also be given slots/budget for faculty development so that they can also attend in-service trainings and seminars like their full time counterparts.

2. Although the results in Admission is Very Good it could be improved still.

3. The Laboratories and other Physical Facilities of the GSEAS be given more priority.

4. Another study could be conducted on the master's theses of the graduates to gauge the quality of their works which reflect the internal efficiency.
