

## **PHSS: A Proposed Philippine High School for Sports**

This Undergraduate Thesis is Presented to the Faculty of Architecture Department  
College of Engineering, Architecture and Technology  
De La Salle University– Dasmariñas  
City of Dasmariñas, Cavite

In Partial Fulfillment of the Requirements in Architectural Design 9 and  
Architectural Design 10 – Architectural Thesis (ARCH 511/L and ARCH 521/L) for  
the Degree of Bachelor of Science in Architecture

**Arch. Antonio V. Gutierrez Jr., UAP, RMP**

## ABSTRACT

In the early years of history, Philippines was superior in sports and was giving the Philippines honor and pride. But as years passed by, it declined. Philippines sports has been an issue for years now. Filipino athletes face a lot of problems in terms of appropriate training program and modern facilities. Last 2012 Olympics, the Philippines sent the smallest number of delegation to join since 1996 with just 11 athletes and went home without any single medal. This only shows the declining state of the Philippines sports in relation to international sporting events.

This study is a project based approach that offers architectural rejoinder on the various issues, concerns and trends about Philippine sports that could put forward the Philippine sports through physical development. This study focuses on the identification of the site, space programming, Occupant Behavior Analysis and, definition and conceptualization of form. It, likewise, touches on the integration of utility system concepts such as structure, electrical aspects, sanitary, plumbing, and security.

This study is predominantly descriptive- qualitative that the historical data were gathered through secondary sources. After the gathering of data, identification of the possible site of the project was done. All the gathered data were analyzed to come up with the best architectural solution for the project.

The architectural proposal will become the core complex for both the academic and sports training of future student athletes. It will be situated in San Jose de Monte Bulacan, a suburban area conducive for learning and training of students. The proposal will provide a school building and sports training facilities for honing both the academic and sports skills of the students, dormitories both for the students and trainers, and administration building for inquiries and management of the school. The project is hoped to become an image for the Philippines as the first Philippine high school for sports.

**TABLE OF CONTENTS****Abstract****Certificate of Originality****Approval Sheet****Acknowledgement****Chapter I: The Problem and Its Setting**

## 1.1 Introduction

1.1.1 Rationale of the Project	1
1.1.2 Background of the Project	3
1.1.3 Project Goals and Objectives	9
1.1.4 Significance and the Expected Output	10
1.1.5 Scope and Delimitation	11
1.1.6 Operational Definition of Terms	12
1.1.7 Acronyms and Abbreviation	12

**Chapter II: Theoretical Framework**

2.1 Review of Related Literature	13
2.1.1 Building Laws	13
2.1.2 Principles of Planning	14
2.1.3 Governing Agencies	16
2.1.4 Other Related Literature	18
2.2 Review of Related Projects	18
2.2.1 Local Projects	18
2.2.2 Foreign Projects	20
2.3 Conceptual Framework	22
2.4 Methodology	23
2.4.1 Methods of Gathering Data	23
A. Data Sourcing	23
B. Site Identification	24
C. Data Analysis	24
2.4.2 Methods of Presentation of Data	26
A. Site Analysis	26
B. Space Programming	26

C. Form Concept	26
D. Utility Concept	27
E. Site Development	27
F. Preliminary Plans and Design Schemes	27
G. Evaluation of Schematics	28
H. Finalization of Floor Plan and Form	28
2.4.3 Methods of Presentation of Output	28
<b>Chapter III: Site Justification</b>	
3.1 Site Criteria Derivation Philosophy	29
3.2 Site Selection Process	33
3.2.1 Pre-qualification of Site	33
3.2.2 Implementation of Site Criteria	35
3.2.3 Validation of the Implemented Criteria	41
3.3 Macro Site Analysis	43
3.3.1 International Setting	43
3.3.2 National Setting	44
3.3.3 Provincial Setting	45
3.3.4 City Setting	45
3.4 Micro Analysis	48
3.4.1 Site Profile	48
3.4.2 Site Inventory	49
3.4.3 Site Analysis	51
A. Movement and Sensory Analysis	51
B. Slope and Vegetation	52
C. Microclimate	53
3.4.4. User Catchment Area	53
<b>Chapter IV: Architectural Design Development and Architectural Engineering</b>	
4.1 Derivation of Architectural Spaces	54
4.2 Building Space Program	55
4.2.1 Organizational Chart	55
4.2.2 User Analysis	56

4.2.3 Behavioural Analysis	56
4.2.4 Space Analysis	58
4.2.5 Space Programming Diagram	60
4.2.6 Space Sizing and Quantification	62
4.3 Site Planning and Site Programming	67
4.3.1 Site Arithmetic	67
4.3.2 Site Development Basis	68
4.3.3 Functional Zoning	68
4.3.4 Site Circulation	69
4.3.5 Space Interrelationship	69
4.4 Design Conceptualization	70
4.5 Project Technical Description	76
Chapter V: Architectural Design Translation	
5.1 Project Title and Problem	81
5.2. Design Philosophy	81
5.3 Design Theories and Design Paradigm	82
5.4 Design Conceptualization	84
5.5 Space and Form Evolution	87
5.6 Design Objectives	89
5.7 Design Considerations	89
5.8 Presentation of Drawings	90
