

Biometric Election System for Student Organization Elections

A Thesis Presented to the Faculty of Computer Engineering
College of Engineering, Architecture and Technology
De La Salle University – Dasmariñas
Dasmariñas City

In Partial Fulfillment of the Requirements for the Degree of
Bachelor of Science in Computer Engineering

LIST OF TABLES	viii
LIST OF FIGURES	viii
LIST OF EQUATIONS	viii
ABSTRACT	x
Chapter 1 THE PROBLEM AND ITS BACKGROUND	
1.1 Introduction	1
1.2 Background of the Study	2
1.3 Statement of the Problem	4
1.3.1 General Objectives	5
1.3.2 Specific Objectives	5
1.4 Conceptual Framework	6
1.5 Significance of the Study	7
1.6 Scope and Delimitation of the Study	8
1.7 Definition of Terms	9
Chapter 2 REVIEW OF RELATED LITERATURE	
2.1 Foreign Literatures	14
2.2 Local Literatures	18
2.3 Foreign Studies	19
2.4 Local Studies	22
2.5 Relevance to the Present Study	24
Chapter 3 RESEARCH METHODOLOGY	
3.1 Research Method/Design	27
3.2 Research Instruments	33
3.2.1 Survey Questionnaires	33
3.2.2 Interviews	33

3.2.3 Software Tools	
3.2.3.1 Microsoft Access	33
3.2.3.2 Microsoft Visual Studio 2010	34
3.2.3.3 .Net Framework	34
3.2.3.4 Adobe Photoshop	34
3.2.3.5 U.are.U 4500 Software Development Kit	34
3.2.4 Hardware Tools	
3.2.4.1 U.are.U 4500 USB Fingerprint Reader	34
3.2.4.2 LAN Cable (Straight Through)	35
3.2.4.3 Ethernet Switch of the CISCO Wireless-N Router WAG320N	35
3.2.4.4 Laptop	35
3.3 Data Gathering	
3.3.1 Conducting Research about the Topic	35
3.3.2 Manual Election Time Monitoring	36
3.3.3 Administering of Survey Questionnaires to the targeted Respondents	36
3.3.4 Performing Interviews to the targeted Respondents	37
3.5 Statistical Tools/Treatment of Data	37
 Chapter 4 PRESENTATION, INTERPRETATION, AND ANALYSIS OF RESULTS TABLES AND FIGURES	
4.1 Hardware Requirements	40
4.2 Software Requirements	41
4.3 Software Design	41
4.4 Software Testing	53
4.4.1 Debugging of Codes	53
4.4.2 Testing of System	53
4.4.3 Time Monitoring in Biometric Election	55
4.5 Result of Evaluation	56
4.6 Analysis and Interpretation	65
 Chapter 5 SUMMARY, CONCLUSION, AND RECOMMENDATION	
5.1 Summary	66
5.2 Conclusion	67
5.3 Recommendation	67
BIBLIOGRAPHY	68

APPENDICES

Appendix A	Cost Analysis	70
Appendix B	Gantt Chart	73
Appendix C	Survey Questionnaires	74
Appendix D	Interview Questions	75
Appendix E	Photo Documentation	76
Appendix F	Datasheets	78
Appendix G	Source Codes	83
Appendix H	Letters	132
Appendix I	Curriculum Vitae	137

ABSTRACT

The study Biometric Election System for Student Organization Elections was conducted to address the issues of electoral fraud by candidates whose intentions in acquiring the position are for personal gain instead of being of service to the citizens. Electoral fraud is usually done by manipulating the tally of votes. Aside from intentionally manipulating the tally of votes, there instances where votes are inaccurately tallied causing a candidate to win the position even though they weren't meant to. That is why this study intends to provide the society with secured and accurate elections, where each vote they cast are exactly the ones to be tallied and not a single vote will be manipulated or disregarded.

The study used a descriptive and applied method. The study applied an electronic biometric system and compared it to the existing election system. In comparison with the existing system the electronic biometric system was able to improve the electoral process in terms of security, time efficiency, ease process and providing accurate results.

This study aims to keep the electoral process as transparent as possible and give the people the power to choose their leader, who they think will be able to serve them and create a better society, because true leadership aims to serve the people they are leading.
