ABSTRACT

In our society nowadays, children and teenagers tent to spend their free time playing computer games.

These computer games make even the adults become addicted to them. These issues led the proponents to develop a game that would not only entertain the users but also give them information.

The game entitled Round Trip Run - Philippines. This game is a 3D-running game features the different tourist attractions and sceneries in the Philippines in the different levels of the game.

The proponents, through all the experience of playing interactive games, had come up with the idea of creating a game system that used all the information and idea gathered from similar games to create a game that will satisfy the users. A game that will be entertaining and informative at the same time.

CHAPTER 1

INTRODUCTION

1.1 Project Context

Web-based games nowadays are growing each day, getting faster, powerful and innovative. More and more people use games in their everyday life, whether for business, communication or entertainment.

A web-based game is also known as a browser game, a computer game that is played over the internet using a web browser. The creation of such game usually involves use of standard web technologies as a frontend and other technologies to provide a backend. Browser games includes all video game genres and can be played by a single player or multiplayer. Web-based games are also portable and can be played on multiple different devices, web browser and operating systems.

With the popularity and high demand for browser games nowadays, the proponents believe that if an arcade style game, will developed simple but intense gameplay with fascinating animations and motivating score system, it would captivate more users. With such considerations, the proponents decided to develop the game “Round Trip Run-Philippines”.
