

### ABSTRACT

The title “Android Edutainment Game: Adventure Time” itself seems familiar to everyone. This is not the typical Adventure Time cartoon that kids watch on television. It is just an inspiration because our game is about learning and travelling to our country.

It is an educational / entertainment game wherein children are learning at the same time enjoying. Android applications are in demand nowadays, so the proponents decided to develop a game for this operating system. In developing the system, the proponents had a hard time in studying Adobe Flash CS6, the software used in developing the system.
