## ABSTRACT

The purpose of this study is the development of an Online Sales and Inventory System for E-trade Enterprise. The proponents conducted a study on the existing system of the company, and determined all the requirements of the store from order taking, sales and inventory keeping and ensured that the proposed system will meet all of these. With the development of an Online Sales and Inventory System, E-trade is expected to be modernized and up to date system wise, allowing E-trade to be competitive with other computer stores. The proponents used Microsoft Visual Studio 2010, ASP.NET C# and MySQL database in developing the Online system. The proponents kept a time table wherein the development of the system was divided into modules. They also diligently studied the functions of Online Sales and Inventory keeping to develop their programming and documentation skills resulting to have a flawless system that will benefit E-trade Enterprise.

## TABLE OF CONTENTS

<b>CHAPTER 1: Introduction</b>	
Background of the Study	6
Statement of the Research Problem	8
Statement of Objectives	10
General Objectives	10
Specific Objectives	10
Significance of the Study	11
Scope and Limitations of the Study	12
Methodology	13
<b>CHAPTER 2: Review of Related Literature</b>	18
<b>CHAPTER 3: Theoretical Framework</b>	
Statement of Assumptions	25
Operational definitions	26
Definition of Terms	26
Definition of Processes	28
Theories Used in the Study	31
<b>CHAPTER 4: Existing System</b>	
Description the System	38
Definition of Data Capture	39
Inputs	41
Processes	43
Files	46
Outputs	49
Problem Areas	50

<b>CHAPTER 5: The Proposed System</b>	
System Overview	52
System Objectives	53
System Scope	53
System Justification	54
<b>CHAPTER 6: Design</b>	
Inputs	56
Processes	58
Files	64
Output	66
<b>CHAPTER 7: Implementation</b>	
Resource Requirements	68
Installation Plans	70
System Installation	70
Training Plans	71
Conversion Plans	72
Testing	73
<b>CHAPTER 8: Conclusion and Recommendation</b>	
Conclusion	75
Recommendation	76

## **List of Appendices**

Appendix A Letters and Forms

Appendix B Data Flow Diagram (Existing System)

Appendix C Normalization

Appendix D Entity Relationship Diagram

Appendix E Screenshot (Existing System)

Appendix F Data Flow Diagram (Proposed System)

## **List of Tables**

Table 1.0 Definition of Data Capture

Table 2.0 Inputs

Table 3.0 Outputs

Table 4.0 Training Plan Schedule

## **List of Figures**
