
Abstract

As of today, Filipino's are one of the most influential people when it comes to sports. There were Manny Pacquiao, Nonito Donaire, Azkals and the Gilas Pilipinas Basketball Team. Through sports, their lives were being changed and it also made it possible for them to reach their dreams. But not all Filipinos have the chance to reach their dreams. Based from a research, in the recent years in sports history, there was a distressing decline in the international stage, especially when it comes to the Olympic Games. This research will be the key to have an architectural solution for the Filipino Sports. The proposal will be the new home of the athletes plus a new investment for the town of Silang. It will cater different local sports events, international sports events, concerts and training of the athletes.

This study on the proposed Sports-Entertainment and Training Complex categorizes the vital needs of the athletes in the Philippines. It concludes analysis that contains architectural solution with the identified problems and design that will suit the whole project. This proposal will be beneficial to the people of Silang and to the national and aspirant athletes of the whole country.

Hence, the proposal will be the start of a new trend in designing sports complexes. It will also be a good start for the people in Silang to be recognized in dealing with sports activities. This will be a better way to paved the inability of the athletes to be part of the Olympic Games.
