ABSTRACT

Pieces of equipment placed in every classrooms at Candido Tirano Hall(CTH) are vital for the student's learning outcome. Some of these pieces of equipment are expensive and need to be monitored all the time to ensure their availability and for security purposes. The problem would be, not all the time do these pieces of equipment are monitored because of various reasons. Another problem would be, chances are the number of laboratory pieces of equipment on every classroom is not enough to accommodate the number of students assigned to have laboratory classes in these rooms. And in borrowing equipment in the laboratory dispensing room the personnel in the dispensing room don't know the schedule of the student who are borrowing the equipment so they just lend them even if they don't have a laboratory schedule on that specific date and time.

As a solution, a tracking device is to be placed on pieces of on every classroom especially the equipment at laboratory rooms and another device is to be placed at the doors. These devices monitor the pieces of equipment and alert the server when equipment is take out in the room. This will not only secure the laboratory pieces of equipment but also will monitor the number of pieces of equipment inside a laboratory room so that sufficient numbers of pieces of equipment are placed on every room. The laboratory personnel will be also aware that an equipment from a room is taken out, and will make it easier to know if the students borrowing the equipment have schedule during the time that they are borrowing equipment.

TABLE OF CONTENTS

TITLE PAGE	i
ACKNOWLEDGMENT	ii
ABSTRACT	iii
TABLE OF CONTENTS	iv
LIST OF TABLES	vi
LIST OF FIGURES	vi

CHAPTER 1 : INTRODUCTION

1.1 Background of the Study	1
1.2 Objectives of the Study	3
1.3 Significance of the Study	4
1.4 Scope and Limitation	4
1.5 Conceptual Framework	6
1.6 Definition of Terms	7

CHAPTER 2 : REVIEW OF RELATED LITERATURE

2.1 Foreign Studies	8
2.2 Foreign Literature	10
2.3 Local Studies	12
2.4 Local Literature	15
2.5 Relevance to the Present Studies	16

CHAPTER 3 : METHODS OF RESEARCH AND PROCEDURES

3.1 Methodological Framework	17
3.2 Research Method and Design	18
3.3 Testing Methodology	20
3.4 Data Gathering Procedure	21
3.5 Research Instrumentation	22
3.5.1 Literature Survey	22
3.5.2 Industrial Survey	22
3.5.3 Design and Experimentation	23
3.6 Instrumentation	23
3.7 Method of Presentation and Interpretation of Data	24
3.8 Statistical Tool/Treatment of Data	24
3.9 System Conceptualization	25

CHAPTER 4 : RESULTS AND DISCUSSION

4.1 Project Model and Development	31
4.1.1 Software Description	33
4.1.2 Hardware Description	33
4.2 Project Structure	34
4.2.1 Login Page.....	34
4.2.2 Dashboard	36
4.2.3 Transaction Page	38
4.2.3.1 Transaction Verification Page	38
4.2.3.2 Return Transaction.....	42
4.2.4 Admin Page	43
4.2.5 Student Page	47
4.2.6 Forms Page	52
4.2.6.1 Equipment Info Page	52
4.2.6.2 Experiment Info Page	57
4.2.7 Schedule Page	60
4.2.7.1 Room Form	60
4.2.7.2 Course Form	63
4.2.7.3 Section Form	64
4.2.7.4 Schedule Form	65
4.2.8 Gallery	67
4.3 Evaluation Procedure	70
4.3.1 Survey.....	70
4.3.2 Testing	71
4.4 Operation Procedure.....	83
4.5 Operation Results	83

CHAPTER 5 : CONCLUSION AND RECOMMENDATION

5.1 Conclusion	86
5.2 Recommendations	88

BIBLIOGRAPHY	89

APPENDICES

Appendix A Tallied Survey	94
Appendix B Screenshots on iPhone 4 Safari Browser	102
Appendix C Actual Picture	108
Appendix D Costing of Materials	110
Appendix E Source Code	112
Arduino Codes	113
Java Program	130

PHP	147
Appendix F Data Sheet	430
Arduino Uno	431
Arduino Mega	432
Arduino WiFi Shield	433
Short Range RFID Reader	434
Long Range RFID Reader	435
Appendix G Sample Survey Form	436
Appendix H Forms and Certifications	438
Oral Defense Form	439
Endorsement Form	442
Certification of Proofreader	443
Appendix I Curriculum Vitae	444

LIST OF TABLES
