ABSTRACT

The project is ANIMOBILE an android application which offers quick dissemination of important announcements through the mobile application. De La Salle University-Dasmariñas currently uses MyDLSU-D portal for information dissemination.

The proposed system done by the proponents solves the problems encountered by the students and faculty members regarding the lack of dissemination of important events or dates. All notifications and important requirement dates will be posted using ANIMOBILE. The developed application will be a huge improvement and a great tool for the educational institution.
