

ABSTRACT

**Information System on Patients' File Management System
(Internal Medicine and Gastrointestinal)**

^{1/} The Information System on Patients' File Management System is developed for the clinic of Doctor Fred Vistal at Medical Center Manila, located at United Nations Avenue. ^{1/} The Information System on Patients' File Management System ^{2, 14} covers the record files of the patient of the said clinic. It was developed using the Visual Basic as the programming language. ^{2/}

³ The system objectives for the users of the system are: to provide information system regarding with the files of the patient in the clinic; to provide easy access of the information to the user; to lessen the use of the patient form ³ regarding the patient profile. ⁴ The system is also created to save time of the doctor, the secretary and the patient in filing the patient profile ^{4/} listed on the patient form. ^{5/} It also provides a hardcopy about the result of the findings for the patient's copy. ⁶
