## ABSTRACT

✓ The Automated Courseware in Turbo C was developed to enhance students' skills in learning and initiate them to a self-paced learning. The courseware facilitates tutorials and practice drills that provide presentation of lessons, quizzes and major examination.

③ Developed under Microsoft Visual Basic 5.0 that provides a full set of built-in intelligent tools.

! Computers are not seen as a substitute for a teacher. Using the software does not necessarily mean replacing the traditional mode of learning, only the paper-based learning. The courseware serves as a supplement tool to the conventional way of teaching and also it will assist the teacher in presenting and implementing the lessons and evaluation of students' performances through scores obtained in quizzes and major examinations.

TABLE OF CONTENTS

|                |   |
|----------------|---|
| <b>CHAPTER</b> |   |
| 1              | <b>Introduction</b>   |
| 1.1            | Background of the Study..... 1-1                                    |
| 1.2            | Statement of the Research Problem..... 1-2                          |
| 1.3            | Statement of Objectives..... 1-2                                    |
| 1.3.1          | General Objectives..... 1-2   |
| 1.3.2          | Specific Objectives..... 1-2  |
| 1.4            | Significance of the Study..... 1-3                                  |
| 1.5            | Scope and Limitations of the Study..... 1-3                         |
| 1.6            | Statement Assumptions..... 1-4                                      |
| 2              | Review of Related Literature..... 2-1                               |
| 3              | Methodology..... 3-1  |
| 4              | Theoretical Framework..... 4-1                                      |
| 4.1            | History of Computer Assisted Instruction..... 4-2                   |
| 4.2            | History of Structured Programming..... 4-4                          |
| 4.3            | The Origin of C..... 4-7  |
| 5              | Requirements Analysis and Software Specifications                   |
| 5.1            | System Overview..... 5-1  |
| 5.2            | System Objectives..... 5-3  |
| 5.2.1          | General Objectives..... 5-3   |
| 5.2.2          | Specific Objectives..... 5-3  |
| 5.3            | Scope and Limitations..... 5-3                                      |
| 5.4            | Assumptions..... 5-4  |
| 5.5            | Requirements and Needs..... 5-4                                     |
| 5.6            | Problems that Brought About the Development of the Project..... 5-6 |
| 6              | Design Issues   |
| 6.1            | Design Overview..... 6-1  |
| 6.2            | Design Levels(Architectural and Specific Design)..... 6-2           |
| 6.3            | Design Scheme..... 6-6  |
| 7              | Implementation  |
| 7.1            | General Issues..... 7-1   |
| 7.2            | Program Requirements..... 7-1                                       |
| 7.3            | Module Implementation..... 7-2                                      |
| 7.4            | Testing and Acceptance..... 7-2                                     |
| 7.5            | Implementation Schemes and Issues concerning the software..... 7-2  |
| 8              | Results and Observations..... 8-1                                   |
| 9              | Conclusions and Recommendations..... 9-1                            |
|                | Appendices  |
|                | Glossary  |
|                | References  |

## LIST OF APPENDICES

APPENDIX A: Syllabus

APPENDIX B: Data Dictionary

APPENDIX C: Gantt Chart

APPENDIX D: Sample Prototypes

APPENDIX E: Certification of the Review Panel

APPENDIX F: Special Problem Clearance

APPENDIX G: Certification of the Editor

APPENDIX H: Certification of the CRC Representative

APPENDIX I: Certification of the Thesis Adviser

APPENDIX J: Feedback

APPENDIX K: Referral Letter

APPENDIX L: Curriculum Vitae
