ABSTRACT

NAME OF INSTITUTION : De La Salle University - Dasmariñas

ADDRESS : Dasmariñas, Cavite

TITLE : Cavite Political Structure Information System

AUTHOR : Mailah Pamela Anicete Moreto , BS Computer Science

FUNDING SOURCE : Parents

COST : P 8,000.00

DATE STARTED : 13 April 1998

DATE COMPLETED : 25 May 1998

OBJECTIVES OF THE STUDY :

A. GENERAL

To be able to develop a software on the political structure of Cavite using the concepts of computer-based information system.

B. SPECIFIC

1. To develop a stand alone computer that will provide easy access, retrieval and updating of records for the political structure of Cavite.
2. To provide an effective and efficient tool which will help the people of Cavite increase their interest on the study and other related topics.
3. To develop a program that can be updated and serve as a reference material for future researchers.

SCOPE AND COVERAGE :

This study provides the list of government officials from 1980 up to the present year for the twenty municipalities and three cities of Cavite. Government officials listed include the governors, vice-governors, congressmen of the three districts of Cavite, mayors, vice-mayors and councilors.

METHODOLOGY :

The method used in the study was the Systems Development Life Cycle. Researches and other informal interviews was done to facilitate information needed for the proposed system.

OUTPUT OF THE STUDY :

The Cavite Political Structure Information System was developed to help researchers and other persons interested in obtaining the information they need about the officials of the Cavite area. The system can be updated to serve as a reference tool for other researchers.

CONCLUSIONS :

The proponent concluded that the computerization of the records of the selected officials of Cavite provided easy access and retrieval of information helping the municipal or library clerks in maintaining their files. Through the system,

generation of reports will be efficient and less time consuming enabling the researchers to save their time, effort and money.

RECOMMENDATIONS :

The use of sounds and pictures such as maps of each municipality and city is recommended to make the program more attractive and informative to the users.
