## TABLE OF CONTENTS

<b>Abstract</b>	<b>1</b>
<b>CHAPTER 1 Introduction</b>	
1.1 Background of the Study	2
1.2 Statement of the Research Problem	4
1.3 Research Objectives	7
1.4 Significance/Justification	8
1.5 Scope and Limitations	9
<b>CHAPTER 2 Review of Related Literature</b>	
2.1 Local Literature	11
2.2 Foreign Literature	14
<b>CHAPTER 3 Methodology</b>	
3.1 V – Model	18
<b>CHAPTER 4 Presentation of Results/Findings</b>	
4.1 Project Description	22
4.2 Project Structure	22
4.3 Project Capabilities and Limitations	23
4.4 Project Evaluation	29

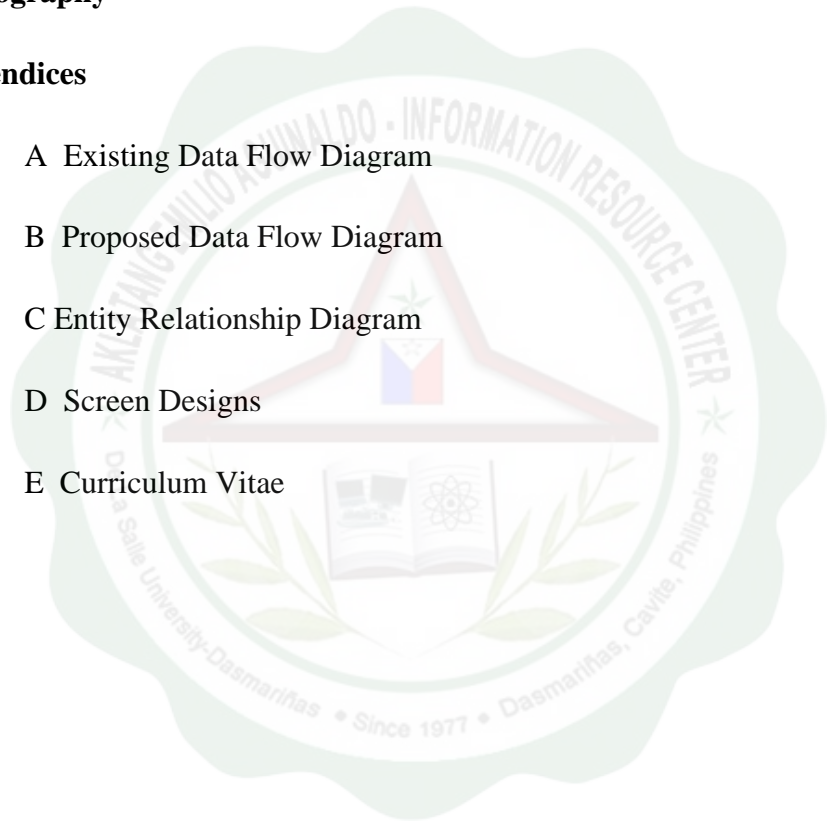

## **CHAPTER 5 Summary of Results/ Conclusion/ Recommendation**

5.1 Summary of Findings	30
5.2 Conclusion	31
5.3 Recommendation	31

<b>Bibliography</b>	33
---------------------	----

### **Appendices**

A Existing Data Flow Diagram	34
B Proposed Data Flow Diagram	35
C Entity Relationship Diagram	36
D Screen Designs	37
E Curriculum Vitae	39

## **ABSTRACT**

The Online Billing and Reservation System was proposed as a replacement for the Manual Billing and Reservation System of La Triel Resort in order that the company may have a systematized form of operation and transaction, in addition to a trouble-free work for the officers in charge. The system will be built on the World Wide Web Technologies, and is operated entirely online providing clients with a friendly, simple yet powerful tool for managing and optimizing throughput.

In addition, the proponents developed a proficient and useful system for La Triel Resort. There will be a reservation of packages, services and products and billing for every transaction. The System provides everyday inventory, and billing and invoices for the client or as requested by the client. Billing would comprise the generation of invoices along with the summary of computations.
