Abstract

Information Dissemination Application is a system that contains a webserver that acts as server/sender and the Android mobile application that acts as a client/receiver. The purpose of this system is to disseminate different kinds of information through the students and faculty of De La Salle Health Sciences Institute by using the either Google Cloud Messaging or by sending SMS notification. The Google Cloud Messaging is for Android users while the SMS notification is only applicable to those non application users.

The proponents developed the webserver for two purposes: To store the personal records and registration ids and to send filtered information to all the users of the mobile application. The mobile application functions are to receive school information from college admin, create personal notes and schedules and to send message to college admin.

This study is evaluated by the college admin, selected faculty and selected students from the college of medicine, college of rehabilitation sciences, college of nursing and midwifery and college of medical radiation and technology of the university. Based on the software evaluation, this system receives a satisfactory and very satisfactory remark in the areas of performance, reliability and user interface.

Based on all the conducted research and development, the proponents believe that this system is useful to the DLS-HSI college admin, faculty and students. This

Table of Contents

Chapter 1:Introduction	1 - 8
1.1 Project Context	1 - 2
1.2 Purpose and Description	2
1.3 Statement of the Research Problem	3
1.4 Objective of the Study	4
1.4.1 General Objective	4
1.4.2 Specific Objective	4 - 5
1.5 Scope and Limitation of the Study	5 - 6
1.6 Significance of the Study	6 - 8
Chapter 2: Review of Related Studies	9 - 16
2.1 Local Literature	9 - 12
2.2 Foreign Literature	13 - 16
Chapter 3: Theoretical Framework	17 - 29
3.1 Research Paradigm	17 - 21
3.2 Concept of the Study	22
3.2.1 Input –Process-Output	22 - 23
3.3 Conceptual Operation	24
3.3.1 Hierarchical Input –Process-Output	24 - 26
3.4 Conceptual Process	26

3.4.1 Installation Plan	26 - 27
3.4.2 Software and Hardware Requirements	28
3.5 Operational Definition of Terms	28-29
Chapter 4: Design and Methodology	30 - 59
4.1 Project Development	30
4.1.1 Screenshots	30 - 48
4.1.2 Data Flow Diagram	49 - 51
4.2 Development Planning	52
4.2.1 Software Suited for the Development	52 - 53
4.2.2 Programming Language used for the Development	53 - 56
4.3 Evaluation of the Project	57
4.3.1 Respondents	57
4.3.2 Research Instruments and Techniques	57 - 58
4.3.3 Data Gathering Procedure	58
4.3.4 Statistical Treatment of Data	59
Chapter 5: Results and Discussion	60 - 73
5.1 Introduction	60
5.2 Results	61
5.2.1 College Administration Evaluation Result	61 – 64
5.2.2 Faculty Evaluation Result	65 – 68
5.2.2 Student Evaluation Result	69 - 73

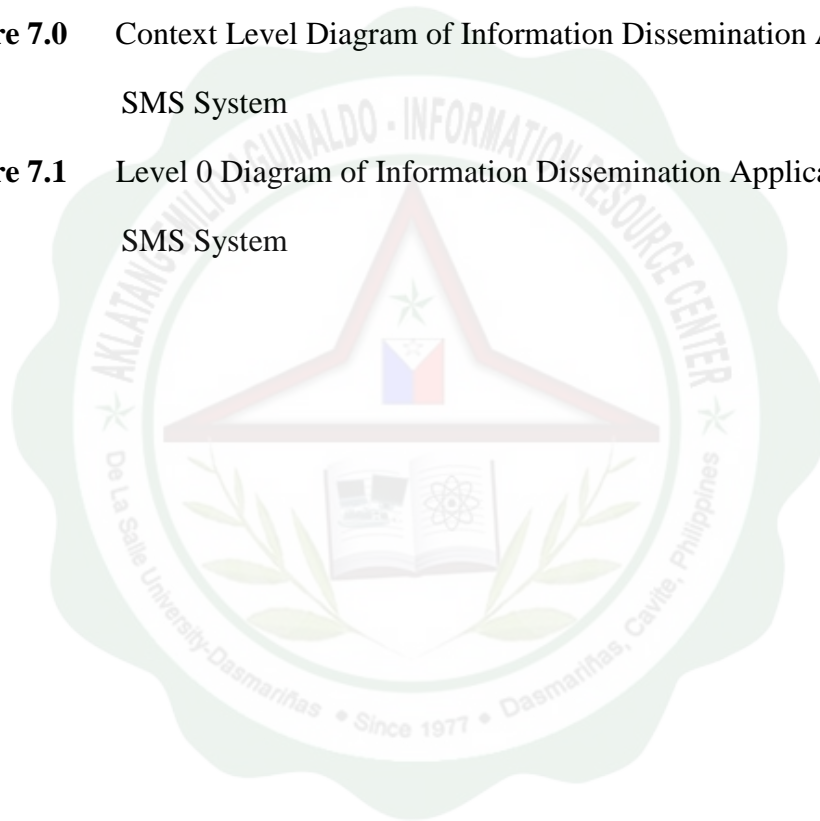

Chapter 6: Conclusion and Recommendation	74 - 75
6.1 Conclusion	74
6.1 Recommendation	74 - 75
REFERENCES	76
