

## Abstract

Multimedia system on "The Passion and the Glory of Corregidor" is the solution to the old fashioned way of learning. This will help the researchers and students who are taking up Philippine History to know the events and activities that happened before.

This software was presented through the use of the multimedia components, namely: sounds, animation, video clip, and text to make the system friendly and entertaining.

Visual Basic version 6.0 was used in developing the multimedia. This software provides a full set of built-in intelligent tool that creating multimedia project can be astonishingly easy. Classmates, friends, and advisers tested the system and reiterated the effective and entertaining way of learning.
