## ABSTRACT

Multimedia Storybook is a computer presentation that combines the aspect of story telling and incorporates the use of computer. The software presents three fairy tale stories namely: *Snow White and the Seven Dwarfs*, *Cinderella*, and *The Emperor's New Clothes*. These narrations are combined with pictures, animation, graphics and video. Users can choose the language setting since the software is presented in bilingual form, English and Tagalog. Definition of difficult terms are also provided to ensure a better understanding of the story. Options in narration are also provided wherein the user can choose whether the stories will be narrated to them or they will be the ones to read the stories. Activities were provided for the users to test their knowledge of the story.

Multimedia Storybook is intended for children ages 4 and up. The software can be used as an educational supplement for learning areas like Reading, Grammar, Filipino, and Computer or as an individualized learning kit.

The software was developed using Visual Basic 5.0. Further development, additions, and modifications were done through the use of softwares like MS Power Point, MS Paintbrush and Adobe Photoshop.
