

ABSTRACT

The De La Salle University – Dasmariñas Orientation Multimedia System presents important facts about the De La Salle – University Dasmariñas, Dasmariñas, Cavite. Significant facts include Brief History, Academic Programs, and a Campus Tour. Through its graphical user interface, the system presents itself in an interactive form, which enables the user to choose the topic of his interest from the selection conferred to him. The history of the institution is presented in a video clip and is discussed further through rich text. The academic program elaborates on the colleges that structure the university while the campus tour is made possible by showing a map (top view) of the campus allowing the user to explore and view individually specific points which are located on it.

Through Visual Basic, an object oriented programming language, varying elements of multimedia such as written text, pictures, animation, sound effects and music, and video were incorporated into the system.

The system is conceived to serve as an aid to De La Salle University – Dasmariñas' orientation program which is held annually by the said institution. The system also has the purpose of being used as a tool for acquiring information and gaining knowledge about the university.
