

De La Salle University – Dasmariñas

Computerized Payroll System for Civilian Employees of (PAF) Sangley Point

An Undergraduate Special Problem

Presented to

the Faculty of Computer Studies Department

De La Salle University Dasmariñas

Dasmariñas, Cavite

In Partial Fulfillment

of the Requirements for the Degree

Bachelor of Science in Computer Science

TABLE OF CONTENTS

1.0 Introduction	1-1
1.1 Background of the Study	1-1
1.2 Statement of the Research Problem	1-1
1.3 Statement of Objectives	1-1
1.3.1 General Objectives	1-1
1.3.2 Specific Objectives	1-1
1.4 Significance of the Study	1-2
1.5 Scope and Limitations of the Study	1-2
1.6 Methodology of the Study	1-2
2.0 Review of Related Literature	2-1
3.0 Theoretical Framework	3-1
3.1 Statement of Assumptions	3-1
3.2 Operational Definitions	3-1
3.2.1 Definition of Terms	3-1
3.2.1 Definition of Processes	3-2
3.3 Theories used in the Study	3-2
4.0 The Existing System	4-1
4.1 Description of the System	4-1
4.2 Definition of Data Capture	4-1
4.3 Inputs	4-2
4.4 Processes	4-2
4.5 Files	4-3
4.6 Outputs	4-3
4.7 Data Flow Diagram	4-5
4.8 Problem Areas	4-6
5.0 The Proposed System	5-1

5.1 System Overview	5-1
5.2 System Objectives	5-1
5.3 Scope	5-1
5.4 System Justification	5-2
6.0 Design	6-1
6.1 Inputs	6-1
6.2 Processes	6-1
6.3 Files	6-4
6.4 Outputs	6-4
7.0 Implementation	7-1
7.1 Resource Requirements	7-1
7.1.1 Software Requirements	7-1
7.1.2 Hardware Requirements	7-1
7.1.3 Human Resources Requirements	7-1
7.2 Installation Plans	7-1
7.2.1 System Installation	7-1
7.2.2 Training Plans	7-1
7.2.3 Conversion Plans	7-2
7.2.4 Testing	7-2
8.0 Cost Benefit Analysis	8-1
8.1 Resource Requirement	8-1
8.2 Operational Setup	8-2
9.0 Conclusions and Recommendations	9-1

ABSTRACT

AFP Sangley Point is located at Cavite City and is currently using a manual system in their payroll.

The present payroll computation for civilian employees of (PAF) Sangley Point, Cavite gives problems both to the accounting office particularly the accountant and employees as well. It takes them much time to finish different workloads like finding employees' record, files, salary computation, and things relevant with the last mentioned. These include the updating of loan, insurance and tracking down of different leaves and giving bonuses, which are importantly related to payroll computation. These led the proponents to develop a solution by providing effective domination of operation and function.

The Computerized Payroll System For Civilian Employees of AFP Sangley Point features different modules such as File Maintenance Module, Process Module, Password Module. It lessens the time consumed in the finalizing and computing payroll.

In order to make the system, the proponents agreed to use the Systems Development Life Cycle(SDLC). The SDLC is a phased approach to analysis and design, which holds that systems are best developed through the use of specific cycle and user activities.

List of Appendices

Appendix A	Data Flow Diagram of Existing System	A-1
Appendix B	Data Flow Diagram of Proposed System	B-1
Appendix C	Entity Relationship Model	C-1
Appendix D	Screen Outputs	D-1
Appendix E	Printouts	E-1
