

ABSTRACT

The Cavite Doctors Medical Center- Billing System (CDMC-BS) is developed for CDMC located at De Fuego Gen. Trias, Cavite. The CDMC-BS is a Visual Basic 6.0 software specially designed for computing bills of patients. It is a system that would be responsible for almost all the billing transactions in the hospital. Thus, making the everyday duties of the cashier a lot easier. The proposed system covers the automation of Billing System of CDMC, and it includes the processing of accounts of patients in the hospital, patient information, and the statement of account of each patient. However generating reports on the accumulated income, medicines sold by the hospital, deductions of PhilHealth members are computed in the Accounting Section. Therefore these are not included in the proposed system.
