De La Salle University - Dasmariñas

Abstract

The De La Salle University- Dasmariñas On- line Campus Tour presents important facts about the said institution by showing the exact location of the buildings and about the system as well. This includes the significant facts about the university's: Brief history of each building inside the campus, short description of the name of buildings, the structure and picture of the buildings was also implemented. It can attract many of the users because of its Graphical User Interface or GUI, which allows the user to choose the topic of his/her interest from the selection.

The system is conceived to serve as an aid to the De La Salle University- Dasmariñas orientation program, which held annually by the said institution. The system also has the purpose of being used as a tool for acquiring information and gaining knowledge about the university. [PDRR00]
