De La Salle University - Dasmariñas

Abstract

De La Salle University – Dasmariñas College of Science Student Advising System (DLSU-D COS SAS)is an Automated Student Advising System that will track all the subjects that the students can take for the next semester, it can also determine the status of the student, it also includes the student academic files, curriculum flowchart and grades of the students. The system can also track whether the subject is prerequisite or not and it allows the authorized persons to add, edit, delete the main features and processes of the system. The system is made using Microsoft Visual Basic 6.0 language and it will generate reports using the Report Designer from Visual Basic. The database used by the system is made using Microsoft Access.
