ABSTRACT

Metro Tagaytay College of Business and Arts (MTCBA) is the first institution of higher learning in Tagaytay. This was established to support the government's thrust towards countryside development.

MTCBA uses the manual process in enrollment system which is time consuming to both students and administrators. Since the college now accepts more students, applying their existing system would mean existence of problems due to mismanagement of files.

The proposed system would help eliminate the flaws and will provide fast, reliable and efficient process to the needs of the institution that will make way to the achievement of goals of MTCBA in their Enrollment System.
