ABSTRACT	viii
Chapter 1: Introduction	
1.1 Background of the Study	1-1
1.2 Statement of the Problem	1-2
1.3 Statement of Objectives	
1.3.1 General Objective	1-3
1.3.2 Specific Objectives	1-3
1.3.3 Project Deliverables	1-4
1.4 Significance of the Study	1-4
1.5 Scope and Limitation	1-5
1.6 Methodology of the Study	
1.6.1 Prototyping	1-5
Chapter 2: Review of Related Literature	2-1
Chapter 3: The Existing System	
3.1 Current System Overview	
3.1.1 Application Process	3-1
3.1.2 Record Newly Arrived Books	3-1
3.1.3 Report Generation	3-1
3.1.4 Book Searching	3-2
3.1.5 Borrowing Process	3-2
3.1.6 Returning Process	3-3
3.2 Administrative Setup	
3.2.1 Library Card Acquisition	3-4
3.2.2 Student Book Loaning Procedure	3-4
3.2.3 Report Production	3-5
3.2.4 Faculty Book Loaning Procedure	3-5

3.2.5	Periodicals and Reference Collection	
	Borrowing Procedure	3-6
3.2.6	Faculty Book Reservation	3-6
3.2.7	Student Book Reservation	3-7
3.2.8	Book Returning and Issuance of Fines

3.5	System Outputs	
3.5.1	Book Card	3-12
3.5.2	Card Catalog	3-13
3.5.3	Overdue Slip	3-13
3.5.4	Daily Record of Borrowed Materials	3-14
3.5.5	Report for New Arrival of Books	3-14
3.5.6	Report for Overdue Books	3-15
3.6	Problems and Difficulties with the Current System	
3.6.1	Procedures	3-16
3.6.2	Manpower	3-16
3.6.3	Equipment	3-17
3.6.4	Materials	3-17
Chapter 4:	The Proposed System	
4.1	Description	4-1
4.2	Scope of the Proposed System	
4.2.1	Book Searching/Book Availability	
	Verification	4-1
4.2.2	Automated Card Catalog Searching	4-1
4.2.3	Patron Book Borrowing Procedures	4-1

4.2.4	Patron Returning of Books Procedures	4-1
4.2.5	Various Library Transaction Reports Generation	4-1
4.3	System Justification	4-2
4.4	System Design	
4.4.1	Inputs	4-2
4.4.2	Processes	4-2
4.4.3	System Objectives	4-4
4.4.4	System Outputs	4-5
4.5	Architectural Design	
4.5.1	Splash Screen	4-5
4.5.2	File	4-6
4.5.3	Edit	4-6
4.5.4	Transactions	4-6

ABSTRACT

Maximizing the usefulness of information is one of the key elements a good education can attain. The school library has been recognized as one of the vital parts of a school system. St. Joseph's Academy provides variations of student transactions and services. They provide the transaction to facilitate different student assessments similar to transactions made upon access on the books provided in the school library. The currently implemented manual system has a slow process of completion and by these, the proponents of the St. Joseph's Academy Library Information System have developed quality software accounted to important services that must be provided by the library. In order to improve some features of the system that would help the institution meet its information needs, the proponents designed a system that is a combination of the existing and the new processes including improvements necessary in the system implementation. Prototyping methodology was used in conducting the study and Microsoft Visual Basic™ 6.0 Professional Edition was the programming language used in creating the software. Another important feature of the system is the ability to produce different library transaction reports necessary for student verification and clearance based on the patron-unprocessed fines. Further improvement may include bar code and networking upon execution of the system.
