## Abstract

Dasmariñas Public Library has been using a manual system ever since it started. As the growing number of members and books increases in the library, transactions are becoming more tedious which becomes a problem. This problem is the concern the proponents have taken up. The proponents had analyzed and examined the existing system (manual system) of Dasmariñas Public Library and were able to find solutions and develop a system designed to meet the identified needs and requirements of the public library. This research project aimed to introduce a computerized library system for the Dasmariñas Public Library.

This new computerized library information system concentrated on the task of the librarian. The system task includes a security feature using a password, a database for adding book and member list, capable of searching encoded book and member numbers to read both book and member information needed for a borrowing or returning process, an automated borrowing and returning scheme, updating records of the book transacted in the library for periodic reports, capable of printing reports, and assess book fines. The librarian and the proponents are those who can access the system. In this way, records would be kept confined.

Using Visual Basic version 6 with the aid of Microsoft Access developed the computerized library information system. The proponents were able to create a database for easy retrieval and modification of data. The Graphical User Interface (GUI) of the system is made straightforward and very efficient in understanding the system.

<b>Table of Contents</b>	<b>Page</b>	
Title Page		
Approval Sheet		
Acknowledgement	ii	
Abstract	iii	
Table of Contents	iv - v	
List of Appendices	vi	
<b>Chapter 1</b>	<b>Introduction</b>	
1.1	Company Background	1-1
1.2	Problem Statement	1-2
1.3	Statement of Objectives	1-2
1.3.1	General Objectives	1-2
1.3.2	Specific Objectives	1-3
1.4	Significance of the Study	1-3
1.5	Scope and Limitation	1-3
1.6	System's Methodology	1-4
1.6.1	Rapid Application Development	1-4
1.6.2	Method of Data Collection	1-5
1.6.3	Method of Analysis	1-5
<b>Chapter 2</b>	<b>Review of Related Literature</b>	2-1
<b>Chapter 3</b>	<b>The Existing System</b>	3-1
3.1	Current System Overview	3-1
3.2	Administrative Setup	3-1
3.3	System Coverage	3-2
3.4	System Inputs	3-4
3.5	System Outputs	3-5
3.6	Problems and Difficulties with the Current System	3-5

<b>Chapter 4</b>	<b>The Proposed System</b>	<b>4-1</b>
4.1	Description	4-1
4.2	Scope of the Proposed System	4-1
4.3	System Objectives	
4.3.1	General Objectives	4-1
4.3.2	Specific Objectives	4-2
4.4	System Justification	4-2
4.5	System Design	4-2
4.5.1	Inputs	4-2
4.5.2	Processes	4-3
4.5.3	Outputs	4-4
4.6	Architectural Design	4-4
4.7	Database Design	4-11
<b>Chapter 5</b>	<b>Conclusion and Recommendation</b>	
5.1	Conclusions	5-1
5.2	Recommendations	5-1

**Lists of Appendices**

Appendix A	Certification by the Special Problem Review Panel	A-1
Appendix B	Special Problem Clearance	B-1
Appendix C	Certification by the Editor	C-1
Appendix D	Certification by the CRC Representative	D-1
Appendix E	Certification by the Adviser	E-1
Appendix F	Rapid Application Development (RAD) Model Diagram	F-1
Appendix G	Ishikawa Diagram	G-1
Appendix H	Existing Context Diagram	H-1
Appendix I	Existing Data Flow Diagram Level 0	I-1
Appendix J	Existing Data Flow Diagram Level 1	J-1
Appendix K	Proposed Context Diagram	K-1
Appendix L	Data Flow Diagram Proposed Library System	L-1
Appendix M	Proposed Data Flow Diagram Level 0	M-1
Appendix N	Proposed Data Flow Diagram Level 1	N-1
Appendix O	Dialogue Tree	O-1
Appendix P	Data Dictionary	P-1
Appendix Q	Entity Diagram	Q-1
Appendix R	Entity Relational Diagram	R-1
Appendix S	Normalization	S-1
Appendix T	Analysis Tools	T-1
Appendix U	Project Schedule	U-1
Appendix V	Existing Forms	V-1
