X – Homes Improvement Sales and Inventory System

ASNDG

A Special Problem
Presented to
the Computer Studies Department
College of Science
De La Salle University-Dasmariñas

In Partial Fulfillment
of the Requirements for the Degree
Bachelor of Science in Computer Science

by

Guevarra, Ruthie Anne
Morales, Robert
Turiano, Beridigna

Table of Contents	
Abstract	
Acknowledgment	
1.0 Introduction	
1.1. The Problem and its Background	1-1
1.2. Statement of Objectives	
1.2.1. General Objectives	1-2
1.2.2. Specific Objectives	1-2
1.3. Significance of the Study	1-3
1.4. Scope and Limitations of the Study	1-3
1.5. Methodology of the Study	1-4
2.0 Review of Related Literature	2-1
3.0 The Existing System	
3.1 Current System Overview	3-1
3.2 Administrative Setup	3-2
3.2.1 Sales Procedure	3-2
3.2.2 Inventory Procedure	3-2
3.3 System Coverage	3-2
3.4 System Inputs	3-3
3.5 System Outputs	3-3
3.6 Problems and Difficulties with the Current system	3-4
4.0 The Proposed System	
4.1 Description	4-1
4.2 Scope of the Proposed System	4-1
4.3 System Objectives	4-2
4.4 System Justification	4-3
4.5 Design	4-4
4.5.1 Inputs	4-4
4.5.2 Processes	4-5
4.5.3 Outputs	4-7
4.6 Architectural Design	4-7
4.7 Database Design	4-11

Appendices

Appendix A	Certification
Appendix B	Official Clearance
Appendix C	Editor Certification
Appendix D	CRC Representative Certification
Appendix E	Adviser Certification
Appendix F	Entity Relationship Diagram
Appendix G	Entity List
Appendix H	Context Diagram of Existing System
Appendix I	Level 0 Data Flow Diagram Of Existing System
Appendix J	Normalization
Appendix K	Data Dictionary
Appendix L	Ishikawa Diagram
Appendix M	Project Schedule
Appendix N	Context Diagram of the Proposed System
Appendix O	Data Flow Diagram of Proposed System
Appendix P	Dialogue Tree
Appendix Q	Prototype System Screen Design
Appendix R	Screen Design
Appendix S	Sample Reports
Appendix T	Sample Interviews with the Company

ABSTRACT

X-Homes Improvement is a fast growing store that has fast increasing inventory of items. And since many items are hard to keep track with, the people at X-Homes are having a hard time in managing their inventory thus greatly slowing down their work, especially when making sales to customers. Their manual process of encoding their item information into index cards as their storage medium is very prone and susceptible to errors and losses of information.

Thus, the proponents have conducted this study to analyze and solve the problems currently experienced by the company. After the study, the proponents must have supplied X-Homes with an automated system that will be able to help and meet their needs.

In developing the system, the proponents used prototyping method in order for the users to monitor changes in the system and recommend suggestions as the programs evolve in order to make the system efficient and maintainable.
