<b>1. INTRODUCTION</b>	
1.1 Background of the Study.....	1-1
1.2 Statement of the Research Problem.....	1-2
1.3 Statement of Objectives.....	1-2
1.3.1 General Objective.....	1-2
1.3.2 Specific Objectives.....	1-3
1.4 Scope and Limitations.....	1-3
1.5 Methodology.....	1-4
<b>2. REVIEW OF RELATED LITERATURE.....</b>	<b>2-1</b>
<b>3. THE EXISTING SYSTEM</b>	
3.1 Description of the System.....	3-1
3.2 Data Flow Diagram.....	3-2
3.3 Problem Areas.....	3-4
<b>4. THE PROPOSED SYSTEM</b>	
4.1 System Requirements.....	4-1
4.2 Data Flow Diagram.....	4-4
4.3 System Justification.....	4-6
<b>5. DESIGN</b>	
5.1 ER Diagram.....	5-1
5.2 Database and Normalization.....	5-2
5.3 Data Dictionary.....	5-3
5.4 Screen designs.....	5-5
5.5 Process (Pseudocodes).....	5-10
5.6 Report Layouts.....	5-11
<b>6. IMPLEMENTATION</b>	
6.1 Software Requirements.....	6-1
6.2 Hardware Requirements.....	6-1
6.3 Human Resources Requirements.....	6-1
6.4 User's Manual.....	6-2
<b>7. CONCLUSIONS AND RECOMMENDATIONS.....</b>	<b>7-1</b>
<b>APPENDICES.....</b>	<b>A-1</b>

## ABSTRACT

The proposed system will help the user in simplifying the routinary activities from the existing system. The loan will automatically be computed and updated so there is no need for the user to intervene once the loan is already entered unless there is a new loan. Hence, for the withholding tax and other monthly contributions like the Pag-Ibig, PhilHealth, and SSS, the system will automatically compute the range of contribution based from the basic pay of each employee. As the information of all employees are encoded in the proposed system, the user will only enter the summarized attendance information every cut-off date of the salary. Pay slip for the employees can now be easily generated. There is no need to go to each employee's record like the existing system. Moreover, the new system also print monthly reports
