CHAPTER VI

Conclusions and Recommendations

This chapter contains summary of the study as well as the necessary action to be implemented to solve the problem.

Conclusion

Safety on the mixing section is very poor due to the findings that operators in the mixing section were observed to have problems in their work area. Their work area contains air that contains particulate or irritants that affect the job of the workers. These operators agreed that they really need protective equipments in order to efficiently done their jobs.

Feeds with specified products have ingredients that can be classified as an irritant that may result to disease and illnesses.

Recommendation

The authors would like to recommend alternative 1 to come up with an action that can provide good results in the existing problem. Alternative 1 will provide the workers the equipment needed for personal safety as well as the workers will be equipped about information on personal safety.
