ABSTRACT

Name of Institution: De La Salle – University – Dasmariñas
Address: Dasmariñas, Cavite
Title: Determining the Effects of Cellphones to its User.
Authors: Marilou Velando
Josszer G. Perdon
Ariel V. Santillan
Funding Sources: Parents cost: Php 1,800
Date Started: August 2002 Date completed: October 2002

Objectives of the study

General:

To determine the health risks regarding the use of mobile or cellular phones.

Specific:

1. To clearly explain the health risks involve.
2. How to minimize radiation effects to the users.

Scope and limitation:

The study was conducted to explain the health precautions given by the specialist regarding the use of cell phones. The study would only present the effects to its user and ways to reduce the exposure radiation emitted by the phones.

Methodology

The researchers gathered information using the internet and by using other related articles. Having to surf the net, the writers downloaded data which have been used as guides and sources of data.
