CONCLUSION AND RECOMMENDATION

Poor Layout in the shop of Administration Maintenance Department in Chpowkng Food Corporation had caused inconvenience to workers. The researchers conclude that such increases fatigue among worker because of unorganized works place. The researcher concludes that the company must rearrange the position of the work place.

The propose layout shows (see Presentation of Data in figure 2) the significance of adjustment of space and its relation. The researchers conclude that new method should be applied inside the company based on their available resources. The uses of new lay out the researcher achieve the objectives.
