De La Salle University - Dasmariñas

ABSTRACT

Title:	Online Computer Aided Instruction in Computer Organization for Information Technology and Computer Science Students of De La Salle University – Dasmariñas
Researchers:	Reycel Ann C. Bacolod
	Nigel Jan P. Celeste
	Rayzianne P. Moreno
Adviser:	Mr. Juanito Doctor
School:	De La Salle University – Dasmariñas
Year:	2013
Degree:	Bachelor of Science in Information Technology

Today, every single work we do is technology dependent. Modern technologies nowadays are increasing more and more. They help us to connect each other easily and receive a lot of convenience. The Online Computer Aided Instruction system helps to communicate the two (2) users: the student and the professor. The main function of this system is to give knowledge to the students even without the professor, it can enhance the ability of the student to focus on their studies, by reviewing the lesson through PC and guide them based on the flow of a particular subject. Only enrolled students of the said subject can access

the system. At the end of every lesson, there is a given quiz to test based on their

understanding.
