### Objective of the Study:

#### A. General

This study is prepared for the purpose of determining the feasibility and viability of establishing a Commercial Baking House at Pala-Pala Dasmariñas, Cavite producing exotic baked desserts.

#### B. Specific

The study will determine the different aspects of the organization such as management, marketing, technical, financial and social.

**Scope and Coverage :**

The proposed project focuses mainly on the management, marketing, technical and financial aspect of the business which covers the first five years (1998-2002) of operation.

this project is feasible and viable

**Methodology :**

The researchers gathered primary data through research and interviews with bake shop owners in and outside Dasmarias, Cavite.

Secondary data were gathered from different government agencies such as Technological and Livelihood Research Center, National Statistics Office, Dasmarias Municipal Office and Department of Trade and Industry.

**Major Findings:**

The kind of business organization is sole proprietorship. The forecast sales for the five years of operation is P 23,825,949.00. At present, demand is still higher than the supply. The project will generate revenues that will benefit the government and the community especially the unemployed people at present.

**Conclusion :**

It has been concluded that the four aspects of marketing should be given focus, the product, price, place and promotion. And based on the findings, the objectives were met.

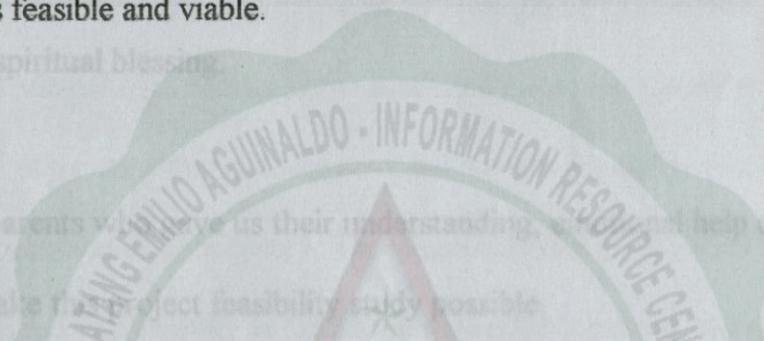

**Recommendation :**

The proponents recommend the proposed project be pursued since it will not only give profit to the owner but beneficial as well to the community and that this project is feasible and viable.

We would like to thank first of all our God Almighty for giving us strength, wisdom and spiritual blessing.

Our parents will give us their understanding, help and financial support to make this project feasibility study possible.
