ABSTRACT

The purpose of this study is to develop a proposed guideline for food safety and sanitation. This study sought to answer the following questions: what is the demographic profile of the respondents in terms of: age, gender, years of service and educational attainment. What are the food safety and sanitation practices observed and applied by the respondents? What guidelines can be proposed for food safety and sanitation for selected establishment in front of De La Salle University - Dasmariñas?

This study focused on creating a proposed guideline of food safety and sanitation in order to ensure the safety of the food that the consumers eat outside of the campus. The selected food establishment in front of De La Salle University – Dasmariñas were the respondents with a total of 51 composed of randomly chosen employees and owners based also on the possession of a sanitary permit.

Finally, based on the results and findings, the researchers proposed recommendations on how to further improve the food safety and sanitation practices of food establishments in front of De La Salle University - Dasmariñas.
