ABSTRACT

Title: Online Billing and Reservation System for Mount Malarayat Golf and Country Club

Researchers: Adrian Carloas Esguerra
Cherry Paguagan
Dorothy Saldua

Adviser: Mrs. Roda N. Sanares

School: De La Salle University – Dasmariñas

Year: 2012

Degree: Bachelor of Science in Information Technology

Online Billing and Reservation System is one of the most in-demand systems all over the world. It is because of the grossing industry of hotels and resorts. Today, many systems have used an automation process like using online computer system, due to the efficiency and accuracy. Online Billing and Reservation System is a transaction processing system that has more advantages

rather than a manual Hotel & Resort Reservation. Prior to the Internet, travelers could write, telephone the hotel directly, or use a travel agent to make a reservation. Nowadays, hotel and resorts have their own website where anyone can view information on prices and deals. Today, most of the hotel and resorts provide goods and services using online computer system. It helps to perform task in an easy way with less time consumed and enhance the operating efficiency, improve the service experience as well as provide a means to access markets on a global basis. There are many advantages in this system like security for the owner, easy to use, and gives convenience to the customers. People and members came unexpectedly in the country club especially during summer. Enable to avoid an overcrowded scene, the proponents came up to an idea that can reserve and schedule a room for the customer and at the same time produce billing payments. Online Billing and Reservation system can help the people to perform a reservation through the use of internet. The reservation in a specific hotel or resort and paying bills can be done easily, no more hassles and time consuming. It is also easy to use because it is user-friendly. The forms are readable and easy to understand. Also, this gives convenience to the customers because they do not need to go to the place to reserve through the use of the online billing and reservation system, the different features of the resort can be viewed freely and easily such as amenities and function rooms, packages and other

services. Computers are commonly used worldwide it can do a lot of things like: storing files, sharing files, editing files, computing income and as a medium of amusement. It is necessary for a business to have such device to maximize the use of hardware and software of the computer to make things easy for the resort in reserving and advertising. Via internet connection, the customers can access information and make reservations online. A Resort basically a place used for relaxation or recreation, attracting visitors for holidays or vacations. Resorts are places, towns or sometimes commercial establishment operated by a single company. With the help of the internet, creating an online reservation and at the same time billing statements can now be possible.
