ABSTRACT

Title: Online Sales and Inventory System for J9NTEL
Computer Marketing

Researchers: Kenneth E. Baleda
Royce A. Caguiat

Adviser: Mrs. Marivic Reyes Mitschek

School: De La Salle University – Dasmariñas

Year: 2013

Degree: Bachelor of Science in Information Technology

This project is aimed at developing an Online Sales and Inventory System for a computer retailer store. This system can be used to store the details of the inventory, update the inventory based on the sale details, produce receipts for sales, generate sales and inventory reports periodically, etc. This is one integrated system that contains both the user component (used by salespersons, sales managers, inventory managers, etc.) and the admin component (used by the administrators for performing admin level functions such as adding new items to the inventory, changing the price of an item etc).
