Online Computer Aided Instruction of Earth Science for BEE/BSE Students in De La Salle University - Dasmariñas

An Information Technology Capstone Project

presented to
The Faculty of the Computer Studies Department
College of Science
De La Salle University-Dasmariñas

In partial fulfillment of the
requirements for the Degree of
BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY

by

Hermono, Sheena Joice, C.

Abstract

List of Tables and Figures

Chapter 1 - Introduction

1.1 Background of the Study

1.2 Statement of the Problem

1.3 Research Objectives

1.4 Conceptual Framework

1.5 Significance of Study

1.6 Scope and Limitations

Chapter 2 - Review of Related Literature

Chapter 3 - Methodology

Chapter 4 - Presentation of Results/Findings

4.1 Project Development

4.2 Development Planning

4.3 Evaluation of the Study

4.4 Respondents of the Study

4.5 Research Instruments and Techniques

Chapter 5 – Discussion/Conclusion of Results/Findings

5.1 Instruments Used to gain Results

5.2 Discussion of the Result

5.3 Conclusion

5.4 Recommendation

- Appendix FExploded Diagram
- Appendix GData Gathering Materials
- Appendix HCurriculum Vitae

ABSTRACT

The proposed Online Computer Aided Instruction system was developed and implemented to help the students to enjoy a new way of learning Earth Science.

The Online Computer Aided Instruction of Earth Science is designed and was developed for the students of the college of education of De La Salle University – Dasmariñas. It delivers lessons and tests the students’ learning capabilities wherein they can access it everywhere with the use of internet.

ASP.Net C# is the programming language the proponents used in implementing the system. ASP.Net C# is a platform that handles many of the complexities of creating Web applications. The proponents used Adobe CS5 in creating simulated lessons and graphics in the system.
