

ABSTRACT

Name of Institution : De La Salle University – Dasmariñas  
Address : Dasmariñas, Cavite  
Title : A Proposed Career Counseling Program for  
Kaong National High School  
Author : Emelina L. Barlaos  
Degree : Master of Arts in Education  
Specialization : Guidance and Counseling  
Date Started : February 1999  
Date Completed : May 1999

OBJECTIVES OF THE STUDY

General:

Design a proposed career counseling program for Kaong National High School (KNHS) SY 1998–1999 based from the assessment of the career development needs of the third year high school students.

Specific:

1. Determine the profile of the respondents as to sex, IQ, and family income
2. Determine the expressed career choices of the third year high school students of KNHS.

3. Find out the level of career development needs of the respondents in terms of (a) decision making, (b) exploring career, (c) developing career awareness, and (d) planning for chosen career plan after graduation.

This study used the descriptive survey research design, which involved 120 or 100% of the third year students of KNHS, Silang, Cavite, SY 1998–1999. A self-made questionnaire based from the career needs assessment of Rye and Sparks (1991) and documentary analysis were the main data gathering tools used. Frequency count, percentage, ranking, mean, and average weighted mean were the statistical tools used for data analysis.

The most expressed career choice among males are those of computational and manipulative type as civil/electrical engineering, seaman, commerce, computer engineering and accountancy while those of the females, the expressed career choice were of verbal type as well as computational and manipulative like computer secretarial, computer science, secretarial, BS Chemistry and vocational course.

As a whole, the most expressed career choices were computer secretarial, computer science, civil/electrical engineering, commerce, and vocational courses.

Lack of information on courses offered in various universities, limits the career choice of the students. There are also inadequacies as to the guidance services of the school particularly in career counseling, thus, the proposed career counseling program for Kaong National High School in Silang, Cavite is highly recommended to be implemented
