Date Started: September 2016

Date Completed: May 2017

The study determined the level of awareness of DLSU-D students on sexual harassment.

The researchers used self-made survey questionnaire in order to acquire all the data and information needed for this study. Questions were prepared to respond for answers to the problems enumerated. A self-made survey questionnaire was administered to the DLSU-D students from the different colleges. Convenience sampling was applied.

The study revealed that the respondents are aware regarding sexual harassment. The overall computed mean is 3.74 which is interpreted as “AWARE”. This implies that the De La Salle University – Dasmariñas students are aware regarding sexual harassment.
