

Abstract

Online Sales and Inventory System is a web application which is made for Touch of Class Furniture Shop. The idea of this thesis is to study the company's current situation and propose a solution in order to digitalize their current processes and overcome the current issues which are being faced daily due to lack of computerized solution. This need of digitalization of their current processes related to order handling will help the company in forecasting their business growth. After that the system requirements were identified and documented. Theoretical review of similar systems was made. And as a result recommendations were given to Touch of Class Furniture Shop.
