## Abstract

The study was made to provide a system that could improve the way of learning PHP of third year Information Technology students of the De La Salle University Dasmariñas. The existing system of De La Salle University Dasmariñas in teaching PHP is through lecture. The professor teaching the students in a classroom, the proponents proposed a system that will make learning of PHP much easier by providing it online. The proposed system consists of other different ways of teaching PHP like video/audio tutorials, plain text, quizzes, exams, games, and simulation

The proponents provided the students a chance to test the system and gave them questionnaire to determine what the students think about the system's overall performance.
