

De La Salle University-Dasmariñas

CAI (Computer - Aided Instruction) :

**Trigonometry for Fourth Year High School Students of
Southern Philippines Institute of Science and Technology**

An Undergraduate Research Proposal Presented to

The Computer Studies Department

College of Science

De La Salle University – Dasmariñas

In Partial Fulfilment of the Requirements for the

Degree of Bachelor of Science in

Information Technology

Bilaw, Milcah P.

Carilla, Arlyn R.

Samaniego, Russel A.

March 2012

TABLE OF CONTENTS

<u>Title</u>	<u>Page no.</u>
ACKNOWLEDGEMENT	i
ABSTRACT	ii
Chapter I - Introduction	1
1.1 Project Context	1
1.2 Purpose and Description	3
1.3 Objectives	4
1.4 Scope and Limitations	5
Chapter II - Related Literature / Systems	6
2.1 Local Related Literature	6
2.2 Foreign Related Literature	13
Chapter III - Technical Background	20
3.1 Research Paradigm	21
3.2 Concept of the Study	19
3.3 Conceptual Operation	19
3.4 Conceptual Process	23
Chapter IV - Design and Methodology	24
4.1 Methodology	24
4.2 Data Flow Diagram	32
Chapter V - Implementation Plans	43
5.1 Installation Plans	43

5.2 Training Plans	44
5.3 Testing	45
5.4 Maintenance	46
5.5 Resource Requirements	46
Chapter VI - Result and Discussion	48
6.1 Instrument Used To Gain Result	48
6.2 Result and detailed discussion obtain in the final evaluation	49
6.3 Basis of Data	50
6.4 Data Tables	50
6.5. Acceptability of the Project	51
Chapter VII - Conclusion and Recommendation	53
7.1 Conclusions	53
7.2 Recommendations	53
APPENDICES	
CURRICULUM VITAE	
BIBLIOGRAPHY	

ABSTRACT

Math is the most difficult subject for some students to learn nowadays. Through internet, however, math word problems become easier for people having so much hard time on teaching math problems. They can also easily learn mathematics, especially in Trigonometry with the help of the proponents system because it includes lessons about different topics like Trigonometric functions, Angle of elevation and more.

The system aims to improve the level of learning of students in Trigonometry. The output is an online based tutoring system in Trigonometry for fourth year high school students. It has different accounts; namely: student, faculty, and administrator. The system is developed using PHP.

The development of an Online Computer-Aided Instruction in Trigonometry for fourth year high school students of Southern Philippines Institute of Science and Technology serves as the foundation of the skills and knowledge of the students as they go on to another step in their school year.
