## ABSTRACT

Royale Tagaytay Gold and Country Club located at Alfonso, Cavite with its amenities and facilities is one of the leading hotels and country clubs in the city. The said Country Club includes a complete sports facilities for its guests and amenities like function rooms, restaurants, work out gyms, fishing area, library, townhouses and a club house. The existing system of the said company uses a manual reservation and billing transaction process so the proponents proposed an Online Portal Type Reservation and Billing System due that the company is private for its members and walk-in guests can only be entertained if it's accompanied by a member or a staff. For a much easier and faster transaction for both the clients and the management, the system being online can be accessed by the users anywhere in the globe where internet is present. The said system is capable of reserving rooms and amenities except for the sports facilities which is a first come first serve basis, also a database is used to replace the manual process of writing all the reservations in a log book, it can also generate reports for the checking of the company's status weekly, monthly and yearly. Cancellation of reservation can also be done online with this system, and all computations for the reservation, use of amenities and facilities are done automatically in a simpler manner of just clicking some features of the system. As for the billing, credit cards can be used to pay the bills but it can still accept cash payment. The system also has a back-up for recovery purposes.

## TABLE OF CONTENTS

Approval Sheet	i
Certification	ii
Acknowledgement	iii
Abstract	iv
Table of Contents	vi
List of Appendices	vii
List of Figures	vii
<b>1.0 INTRODUCTION</b>	
1.1 Background of Study	1
1.2 Statement of the Research Problem	5
1.3 Statement of Objectives	
1.3.1 General Objectives	6
1.3.2 Specific Objectives	6
1.4 Significance of the Study	7
1.5 Scope and Limitations of the Study	9
1.6 Methodology of the Study	11
<b>2.0 REVIEW OF RELATED LITERATURE</b>	
2.0 Local Literatures	14
2.2 Foreign Literatures	16
2.3 Relation to the Study	18
<b>3 THEORETICAL FRAMEWORK</b>	
3.1 Statement of Assumptions	20
3.2 Operational Definitions	
3.2.1 Definition of Terms	21
3.2.2 Definition of Processes	22
3.3 Theories used in the Study	25
<b>4.0 THE EXISTING SYSTEM</b>	
4.1 Description of the System	29
4.2 Definition of Data Captured	30
4.3 Inputs	32
4.4 Processes	33
4.5 Files	36
4.6 Outputs	38
4.7 Data Flow Diagram	
4.7.1 Context Diagram	39
4.7.2 Diagram Zero	40
4.8 Problem Areas	42

5.0 THE PROPOSED SYSTEM	
5.1 System Overview	43
5.2 System Objectives	44
5.3 Scope	44
5.4 System Justification	45
6.0 DESIGN	
6.1 Inputs	46
6.2 Processes	47
6.3 Files	49
6.4 Outputs	50
7.0 IMPLEMENTATION	
7.1 Resource Requirements	
7.1.1 Software Requirements	54
7.1.2 Hardware Requirements	54
7.1.3 Human Resource Requirements	55
7.2 Installation Plans	
7.2.1 System Installation	56
7.2.2 Training Plans	56
7.2.3 Conversion Plans	57
7.2.4 Testing	58
8.0 CONCLUSIONS AND RECOMMENDATIONS	
8.1 Conclusion	59
8.2 Recommendation	59
Bibliography	90

### LIST OF APPENDICES

Appendix A: DFD of the proposed System	60
Appendix B: Entity Relationship Diagram	61
Appendix C: Normalization	65
Appendix D: Reports and Forms of the Existing System	67
Appendix E: Screen shots of the Proposed System	80

### LIST OF FIGURES

Figure 1.0: Prototyping Model	89
