Abstract

This online sales and in inventory system will be a big help to JMC, HONSUN and MONSY auto supply. It could improve the business promotion and generating sales report. It could be a solution of some problems of the company.

The systems provide online shop the customer could buy and view the items online. The customer could also pay online.

With the use of the shopping cart feature, the customers could now see and track the items that they had selected.

After the shopping cart, they could now choose if the transaction of a product will be delivered or the customer will acquire the product through walk-in option.

This allows them to monitor and maintain the inventory of the company. The paper works of the company will also be minimized. The reports and receipts will be generated by the system automatically. Loss of important data will be avoided using the system.
