

**NETWORK – BASED PAYROLL SYSTEM  
for MAKATI INTERDENT INCORPORATION with  
BIOMETRIC TECHNOLOGY**

An Undergraduate Research Presented to  
The Computer Studies Department  
College of Science  
De La Salle University – Dasmariñas

The seal of De La Salle University - Dasmariñas is a circular emblem with a scalloped border. It features a central shield with a red triangle at the top, a white cross, and a blue triangle at the bottom. Below the shield is an open book. The shield is flanked by two green laurel branches. The text "AKLATANG EMILIO AGUIRRE" is written along the top inner edge, and "RESOURCE CENTER" is on the right. The outer ring contains the text "De La Salle University - Dasmariñas" and "Since 1977 • Dasmariñas, Cavite, Philippines".

In Partial Fulfillment of the Requirements for the  
Degree of Bachelor of Science in  
Computer Science

## TABLE OF CONTENTS

1. INTRODUCTION	1
1.1 Background of the study	1
1.2 Statement of the Research problem	2
1.3 Statement of Objectives	4
1.3.1 General Objectives	4
1.3.2 Specific Objectives	4
1.4 Significance of the study	5
1.5 Scope and Limitations	6
1.6 Methodology of the study	7
2. REVIEW OF RELATED LITERATURE	10
3. THEORETICAL FRAMEWORK	17
3.1 Statement of Assumptions	17
3.2 Operational Definitions	17
3.2.1 Definition of terms	17
3.2.2 Defenition of Process	18
3.3 Theories used in the study	19

4. EXISISTING SYSTEM	23
4.1 Description of the Existing System	23
4.2 Definition of Data Capture	24
4.3Inputs	27
4.4 Processes	29
4.5 Files	32
4.6 Outputs	32
4.7 Problem areas	32
5. THE PROPOSED SYSTEM	34
5.1 System Overview	34
5.2 System Objective	35
5.3 Scope	35
5.4 System Justification	35
6. DESIGN	36

6.1 Inputs	36
6.2 Processes	38
6.3 Files	40
6.4 Outputs	46
7. IMPLENTATIONS	50
7.1 Resource Requirements	50
7.1.1 Software Requirements	50
7.1.2 Hardware Requirements	50
7.1.3 Human Resource Requirements	50
7.2 Installation Plans	51
7.2.1 System Installations	51
7.2.2 Training Plans	51
7.2.3 Conversion Plans	52
7.2.4 Testing	53
8. CONCLUSIONS AND RECOMMENDATIONS	54
8.1 Conclusions	54
8.2 Recommendations	55

## Chapter 8

### Conclusion and Recommendation

#### 8.1 Conclusion

The proponents conclude that it is wise for Makati Interdent Incorporation to use the proposed system in order for a much accurate and efficient payroll and daily time record system because it will be more secured against manual errors and will give the company proper information about its products and its customers. The proposed system is specially catered to the specific needs of Makati Interdent Incorporation so this system has great advantage for them.

With a better means of generating reports, daily time record and storing files, the proposed system proves to be much more efficient rather than the manual system that the company has been utilizing.

The proponents implemented a biometrics into the payroll system which provides an easy access for the employees to log in and log out. Upon interviewing the users, the proponents have identified the problems and gave concise and definite solution to the problems

that the proponents had encountered. Also, the proponents defined a functional database that is competent and is sufficient to the needs of the company.

Upon testing and evaluating the performance of the proposed system, the proponents have evaluated whether or not the proposed system is more accurate and efficient compared to the existing system. The limitations of the existing system have been rectified by the new system.

## **8.2 Recommendation**

This system will help future researchers on what process they will use in order to lessen a company's problems. The proponents also recommend that before choosing a particular company to be the subject of study, they must be willing to accept the terms and conditions that it needs.

The proposed system is limited to payroll alone and does not include anything unrelated to payroll system. The future researchers can also use the information stated here as a guide whenever they will
