ABSTRACT

VRA Drugstore is a pharmaceutical company that sells medicines, food, perfumes, medical tools, baby needs and toiletries. VRA Drugstore has a walk-in process of transaction. The customer either has to call the company or go to the store to browse and/or buy products.

After gathering information and interviewing the employees and the owner of VRA Drugstore, the proponents decided to develop an online-based sales and inventory system that would help solve problems in their manual system. The system will also help them increase the profit of their company and will make their job easier, computerize transactions and help the owner easily manage the business. The system provides the customer and the employees a unique username and password.

By replacing the existing manual system of the company, the proposed system will help the company become more competitive than before.

Table of Contents

Chapter 1 Introduction

1.1	Background of the Study	1-2
1.2	Statement of the Research Problem	3
1.3	Statement of Objectives	4
1.3.1	General Objectives	4
1.3.2	Specific Objectives	4
1.4	Significance of the Study	5-6
1.5	Scope and Limitation	6-7
1.6	Methodology of the Study	7-9

Chapter 2 Review of Related Literature

2.1	Online Accounting & Inventory System- Cache Furniture	10
2.2	AbeBooks	11
2.3	SKI North Inventory System	12
2.4	Online Sales and Inventory for Freeman Beauty Products	13
2.5	Online Sales and Inventory System for Lazer Superior Instruments Inc	14
2.6	Online Sales and Inventory System for Wolf-Packaging Company - Philippines	15
2.7	Online Sales and Inventory System for American Packaging Industries	16
2.8	Online Ordering and Inventory System for General Motors, Philippines	17

Chapter 3 Theoretical Framework

3.1	Statement of Assumptions	18
3.2	Operational Definitions	18
3.2.1	Definition of Terms	18-19
3.2.2	Definition of Process	19-20
3.3	Theories used in the Study	20-22

Chapter 4 The Existing System

4.1	Description of the System	23-24
4.2	Definition of Data Capture	24-25
4.3	Inputs	25
4.4	Processes	25-27
4.5	Files	27-28
4.6	Outputs	28-29
4.7	Data Flow Diagram	30
4.8	Problem Areas	30

Chapter 5 The Proposed System

5.1	System Overview	31-32
5.2	System Objectives	32
5.3	Scope	33
5.4	System Justification	33

Chapter 6 Design

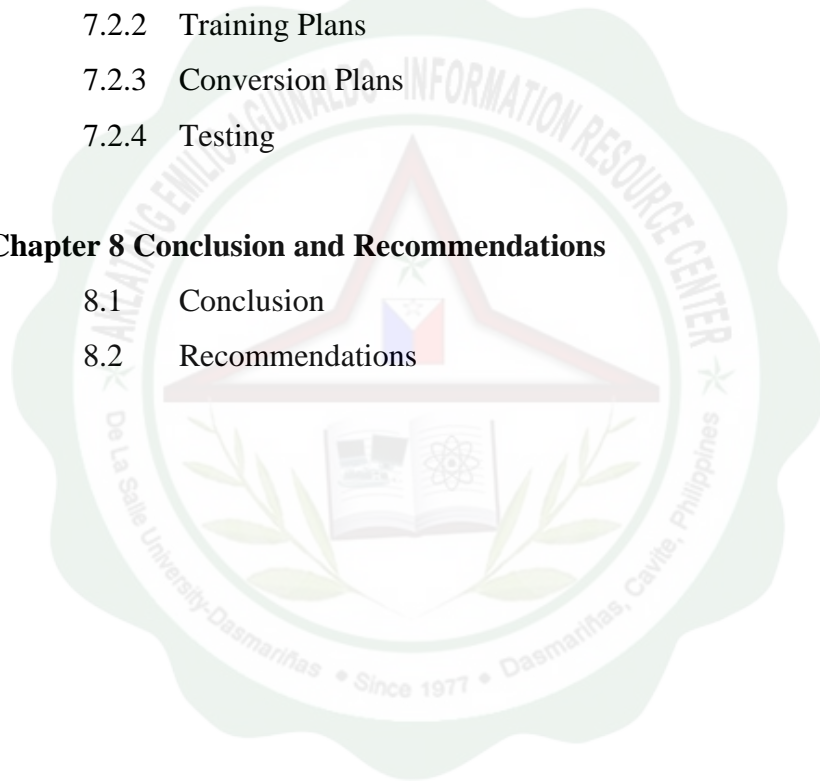

6.1	Inputs	34-35
6.2	Processes	35-37
6.3	Files	38-39
6.4	Outputs	39-40

Chapter 7 Implementation

7.1	Resource Requirements	41
7.1.1	Software Requirements	41
7.1.2	Hardware Requirements	41
7.1.3	Human Resource Requirements	42
7.2	Installation Plans	43
7.2.1	System Installation	43
7.2.2	Training Plans	43
7.2.3	Conversion Plans	44
7.2.4	Testing	44

Chapter 8 Conclusion and Recommendations

8.1	Conclusion	45
8.2	Recommendations	45-46

Appendices

• Appendix A Existing	47-48
○ Context Diagram	47
○ Level 0	47
• Appendix B Proposed Data Flow Diagram	49-51
○ Context Diagram	48
○ Level 0	49
○ Child Diagram of Process 2.0	50
○ Child Diagram of Process 3.0	51
• Appendix C Proposed Entity Relationship Diagram	52
• Appendix D Proposed Normalization	53
• Appendix E Sample Forms and Reports of Existing	54-59
○ Official Receipt	54-56
○ Sales Invoice	57-58
○ Business License Permit	59
○ Sales Report	60-68
○ Delivery Receipt	69-75
• Appendix F Screenshots of the Proposed System	76-78
